DATE: 9/22/54

FROM : [REDACTED]

SUBJECT: Visit with Isbell

1. H. Isbell here this morning. Spent some 4 hours with him. He attached interesting report (sp. Chloroformazine)
 2. Said that since he is carrying no chlorine apparatus now he is ready for another "new compound" (like 3-116C)
 3. Told that we didn't all much want to continue the comparative tests, in view of the data on the part
 4. Told that we have no objection to his publishing the
- 4-1514

Telephone to S.D.

Told that we will try to get Hammond to
check his chlorpromazine data.

Asked what our interest in LSD combination was.
replied to him results of our last discussion about
2:

LSD - C₉THC

" - Scopolamine

" - Cocaine (or cocaine-like material)

" - Butyltitanium (a la Suddens's paper)

Butyltitanium - He will try to get a rep that a sample
on tablets through normal channels to check his results
later

He will contact you in 4 weeks when he gets back
